

Advanced Placement (AP) for Grade 12:

Advanced Placement (AP) is an accelerated program developed by the College Board in the United States. AP offers undergraduate university-level curricula and examinations to high school students. Many colleges and universities across the world may grant course credits or exemptions to freshman students who obtain passing scores on the official examinations scheduled in May 2024.

We strongly believe that our students are ready to take on AP subjects during their final year; even if they are not planning to apply for the AP official examination in May 2024.

Graduating with AP subjects as opposed to regular ones will provide students with a great advantage when applying to colleges and universities.

PARC International School is pleased to announce that the following AP subjects will be embedded into the grade 12 program for the academic year 2023-2024 and offered free of charge (only the official examination fee will be collected if the student plans to apply for it):

- AP Pre-calculus
- AP Biology
- AP Chemistry
